

Sports Park and Recreation Center *(Currently Underway)*

Multiple consultant services are essential to the development and delivery of the Sports Park and Recreation Center project. The City Council awarded three consultant services contracts that will identify and establish accurate surveying and mapping, geotechnical and grading, and drainage for the Sports Park prior to initiating designs that implement the Master Plan. In addition, a contract was awarded to Griffin Structures for construction management services. Below are the project schedules for these consultant services and initiating design services:

Sports Park Surveying and Mapping

On October 20, 2009, the City Council awarded a consultant contract to Mayer & Associates for surveying and mapping services. Aerial, topographic, and boundary maps have been completed. The remaining services include a potential lot line adjustment that may be authorized later in the project.

Sports Park Geotechnical

On September 1, 2009, the City Council awarded a consultant contract to Lawson Geotechnical Consulting (LGC) to perform geotechnical investigations at the Sports Park site. Field work has been completed and a final report has been prepared. The LGC contract includes inspection during the Sports Park grading operations.

Sports Park Grading and Drainage

On October 20, 2009, the City Council awarded a consultant contract to Psomas to prepare engineered plans for mass grading and drainage improvements for the Sports Park site. The Environmental Impact Report was certified by the City Council on April 19, 2011. The City Council selected Project Alternative 7 as its preferred alternative. Applications for needed regulatory permits were submitted to the Regional Water Quality Control Board, Army Corps of Engineers and the Department of Fish and Game. Staff anticipates final design to be completed in March 2012.
